## Professional Summary

Frontend-focused Full-stack Developer experienced in building products from MVP prototypes to full-scale production.

Developed CMS, LMS, data visualization and statistics, designed API/BFF, and implemented automated CI/CD pipelines. Built adaptive landing pages using modern stacks, embedded UMD widgets, shared backend infrastructure serving web and mobile UIs. Led legacy system migrations, including restructuring and rehosting legacy web platforms into maintainable production environments. Wrote thorough documentation for B2B products and in-house tools. Created layouts, assets, and design systems in Figma / Adobe Photoshop.

Experiment with web animations, interactive UI, and motion design on my portfolio: [soranja.dev](https://soranja.dev)
